EDUCATION

Sending School, City, State of School

- Girard High School, Girard, PA

Dates Attended

August 2023-Present

Tech School, City, State of School

- Erie County Technical School, Erie, PA

Dates Attended

August 2024-Present

TECHNICAL SKILLS

Programming: Python, JavaScript, HTML, CSS

Tools: Git, GitHub, VS Code, Vite, Firebase

Hardware: Raspberry Pi, Raspberry Pi Camera, robotics hardware, game controllers

AI: Ollama, LLMs, AI APIs, voice recognition, text-to-speech

Other: Responsive Web Design, Git version control, Linux

PROJECTS

AI-Powered PiDog Robot

Python • Raspberry Pi • Ollama • Robotics

- Developed an AI-enabled robotic dog using a Raspberry Pi and Peto PiDog.
- Connected the robot to an Ollama large language model for AI-powered responses.
- Worked with voice recognition and text-to-speech to create a voice-controlled robot.
- Programmed movement and controller input using Python.
- Configured hardware including a camera, microphone/audio system, sensors, and wireless networking.
- Troubleshooting Linux, Python, GPIO, audio, camera, and hardware integration issues.

Personal Portfolio Website

HTML • CSS • JavaScript • Vite • GitHub

- Designed and developed a personal portfolio website to showcase programming projects and certifications.
- Created individual project pages and certification pages.
- Implemented interactive image galleries and JavaScript functionality.
- Used Git and GitHub for version control and project deployment.
- Deployed the website using a cloud hosting platform.

React Sports Scores Application

React • JavaScript • APIs

- Built a web application that displays sports scores and information.
- Worked with APIs to retrieve and display dynamic data.
- Created an interactive user interface using React components.
- Debugged and improved application functionality during development.

Small Business Website Builder

JavaScript • Firebase • Firestore

- Created a website-building application for small businesses.
 - Used Firebase Firestore to store and retrieve application data.
 - Developed customizable website features and user interfaces.
 - Practiced working with cloud databases and web application architecture.
-
